

# FOXTECH FPV SYSTEM

## Product Specifications

**Production: 10X ZOOM CAMERA**

**Model: FH-10Z**

**Main characteristics:**

- a、Excellent overall performance, Clear bright picture.
- b、Dimensions: 56.2 mm(L)×38.5 mm(W)×32 mm(H).
- c、Selectable by OSD manual.
- d、Suitable for different indoor and outdoor environment.

**Specification :**

<b>IMAGE SENSOR</b>		<b>1/4-inch CCD Image Sensor</b>	
<b>NUMBER OF PIXEL</b>		<b>NTSC : 811 (H) ×508 (V)</b>	<b>PAL : 795 (H) ×596 (V)</b>
<b>PICTURE ELEMENTS</b>		<b>NTSC : 768 (H) ×494 (V)</b>	<b>PAL : 752 (H) ×582 (V)</b>
<b>SCANNING SYSTEM</b>		<b>NTSC : 525 lines, 60 fields/sec</b>	<b>PAL : 625 lines, 50 fields/sec</b>
<b>SYNC SYSTEM</b>		<b>Internal/ VD-Lock</b>	
<b>MINIMUM ILLUMINATION</b>	<b>Typical</b>	<b>0.5 Lux ( F1.8, 5600°K ) 50IRE</b>	
	<b>Star light Mode</b>	<b>0.07Lux ( F1.8, 5600°K ) 50IRE</b>	
<b>RESOLUTION</b>		<b>540TVL</b>	
<b>S / N RATIO</b>		<b>48dB ( MIN ) / 52dB ( TYP ) ( AGC OFF , r=1 , APC OFF , Y-OUT )</b>	
<b>WHITE BALANCE</b>		<b>ATW / AWB / FIX ( Zero color rolling)</b>	
<b>WHITE BALANCE RANGE</b>		<b>3200 ~ 9600 °K</b>	
<b>B.L.C. FUNCTION</b>		<b>Super BLC,48 zone BLC</b>	
<b>GAMMA CORRECTION</b>		<b>0.45 /1</b>	
<b>AGC</b>		<b>AUTO (18dB max)</b>	
<b>ALC</b>		<b>AUTO / FIX</b>	
<b>IMAGE NEGATIVE</b>		<b>Select by OSD menu</b>	
<b>MONTION DETECT</b>		<b>48 zone (select by OSD)</b>	
<b>ELECTRONIC SHUTTER</b>		<b>AES : 1/60(1/50) ~ 1/120,000 sec. / MANUAL : 8 step</b>	
<b>LENS</b>		<b>10X Optical ZOOM LENS ,F1.8(W)~2.9(T),f=4.2mm(W)~42mm(T)</b>	
<b>ZOOM</b>		<b>100X (10X Optical 10X Digital)</b>	
<b>FOCUS</b>		<b>Auto / Manual</b>	
<b>POSITION</b>		<b>64 Position (Zoom , Focus)</b>	
<b>VIDEO OUTPUT</b>		<b>Composite &amp; Y/C output 1.0Vp-p at 75 ohm</b>	
<b>CONTROL FUNCTION</b>		<b>Dry Switch ,RS-232C/RS485 (Drive option ) , OSD control</b>	
<b>OSD LANGUAGE SELECT</b>		<b>ENGLISH / CHINESS_Simp / JAPANESE</b>

## How to use:

Learn the following installation guide, and upon completion, feed the cam with 12V DC in the way as described below, and connect the servo head of zoom controller to one proportional channel on the RC receiver, assign a 3-stage switch on your radio to such channel. When the controller is powered up, the red light will flash, move your switch stick up and down , so the controller will memorize the maximum up and down position of this channel. When the 3-stage switch is in the middle, the cam will be in HOLD mode; when you move the switch up or down, the cam will zoom in or out. Turn the switch back to middle position to stop zooming.

**NOTE:** The cam require minimum operation voltage of 10V , so you may need to add a step-up regulator or use other method to keep the input voltage higher than 10V. e.g. use a 4S lipo battery, then use a step down regulator.

It's strongly suggested to use an all-purpose automatic step-up-down regulator for the cam to maintain its 12V operational voltage, the regulator namely FH—universal v-reg shown as below need to be purchased separately.

This picture shows zoom cam, its controller, universal v-reg, strong aluminum pan/tilt and clear heat shrink. Pan/tilt and v-reg are optional.
